Currently, **more than 570 universities from 35 countries** are collaborating within 73 European University Alliances to shape the future of Europe—while speaking a multitude of different languages.

How does **linguistic diversity** influence communication across research, teaching, and administration?

Is the implementation of **multilingual communication within these alliances** realistic—or is English the only practical solution?

How can **technological innovations** support multilingualism and inclusivity within university alliances?

We invite you to explore these and other questions at our conference, "**No Language, No Alliance – European University Alliances in Dialogue on Language**" on June 29–30 2026, at Haus der Universität in Düsseldorf.
